TAME Range of ELTA

The simulator that trains the IDF's cyber warriors

Flexible and scalable cyber platform for realistic cyber war-games based on the organization's own isolated networking and security tools.

- An automated cyber-attack scenario bank
- A sophisticated learning management system
- Real training environment

The TAME™ Range simulator is used by organizations, armies and governments around the world, and will allow you to practice a variety of realistic defense scenarios.

**Hybrid
learning
and
training
sets tailored
to your
organization**

ICCP

International Center For Cyber Professions

TESI and the Cyber Company of ELTA jointly lead ICCP. The center offers a variety of courses in high demand and will provide its graduates training to the most advanced in the world professional certificate. The variety of frontal and online trainings combined with the simulator, as part of the practical practice of the course, will allow students to study, specialize, gain practical experience, and will provide graduates with advanced professional certificates and a variety of employment options tailored to their interests.
